

## **Business Studies**

Our curriculum in Business aims to recognise students' prior learning through well designed, relevant lessons. Students will be provided with first hand learning experiences, which will help to build and develop their communication, interpersonal and critical thinking skills. The curriculum is an ambitious one that seeks to instil an interest in enterprise and provide students with enhanced business acumen. Within our curriculum students begin on a journey in Year 9, which supports their growth in the subject and makes them more aware of the external environment, whilst providing learners with stronger employability skills for the future.
