

Computing

Our curriculum in Computing is made up of a wide range of opportunities for students to develop practical skills and apply theoretical knowledge of computer science, information and communication technology and graphical design.

It is an ambitious curriculum that seeks to instil a curiosity in technology, understanding of the past and developments for the future.

Our curriculum provides students with fundamental skills that allow them to be digital citizens of the world, positively shaping them in the largest growing industry and equipping them with the problem solving and logic skills they need to apply for the jobs of the future.
