

Technology and Creative Arts

Our Curriculum in Technology and Creative Arts ensures every student experiences a range of techniques and creative skills that allows them to explore, problem solve, think outside of the box, develop an understanding of the world around them and see life with a creative eye.

The lessons taught within our curriculum provide a balance of hard work and dedication, alongside enjoyment and fun. Our main focus is on take home value, students work to achieve a high quality outcome in everything they produce. They explore a range of mediums and many unlock creative potential that will start them on the journey of a successful career in the technology and arts industry.
